Education

February, 2010

This manual is written as a guide for provision of occupational and physical therapy, OT and PT, services in educational programs in Oregon. It is intended for therapists who are new to the educational setting, as well as for those who are experienced in the field, but who are some times challenged to understand the role that OT and PT play in the broad spectrum of educational programs throughout the state. It is also intended as a resource to supervisors who may not have a background in the field of therapy, but who supervise and evaluate therapists.
